Wall Graphic(Vinyl)

Wall vinyl, also known as wall decals, wall stickers, or wall tattoos, refers to self-adhesive vinyl sheets that are applied to walls or other smooth surfaces for decorative and informational purposes. These vinyl sheets are typically made of polyvinyl chloride (PVC) and come in various designs, colors, and finishes, allowing for customization and personalization of living spaces.

Latex vinyl print pasted on curve wall:-

3M self-adhesive vinyl printed on latex machine and pasted on this curve wooden partition with the help of 3M primer. The wall is approximately 25-30 feet wider and 20 feet high.

The vinyl was installed by the bestest vinyl applicators. The application is bubble and dust free.

Alipore Jail

Alipore Jail

Alipore Jail was built in 1846 and was the first of its kind in India. It was designed by a British architect and was built in a style that was typical of the British Raj. The jail was built on a hill and was surrounded by a high wall. It was built with a view of the sea and the hills in the background. The jail was built with a view of the sea and the hills in the background. The jail was built with a view of the sea and the hills in the background.

The Wheel of Time: A 2400-Year saga

આ કુલિ વડનગરનાં 2400 વર્ષના ઇતિહાસની મહત્ત્વ ભરે છે, જ્યાં સંસ્કૃતિ અને કલાકૃતિઓના પહેલા નગરનાં સહ સંમિશ્રિત કલામંડોને પુનઃકાલિત છે. આ પહેલાની નગરની વાર્તાઓને સમજો.

આ વિભાગની સમગ્ર કે 2400 વર્ષ કે ઇતિહાસની ક્રમિક રીતે પ્રગટ કરવામાં આવી છે. ત્યાં સી કલાકૃતિ અને સમયકાલિની કે મીડિયમ, કલા કે સહ સંમિશ્રિત મુખે સી સહ સંમિશ્રિત કરે છે. આ સમગ્ર કે સહ સંમિશ્રિત સમગ્રની સહ સંમિશ્રિત.

This installation offers a window into Vadnagar's 2400-year history, where its antiquities and craftsman traditions bring the city's ancient narrative forward to the present and showcase the character of the city through these models.

Frosted Film

Frosted film is a type of window film that, when applied to glass, gives it a frosted or obscured appearance, similar to etched or sandblasted glass. It provides privacy by blurring views while still allowing light to pass through. This makes it a popular choice for both residential and commercial spaces.

3M #5525 dusted frosted cutting

3M frosted #5525 is cutted on half pressure with the help of plotter cutting machine and is applied on toughened 24 mm thick clear glass.

UV Print

UV printing is a digital printing method where special UV-curable ink is applied to a surface and then instantly cured using ultraviolet (UV) light. This process creates a durable, vibrant, and high-quality print that is instantly dry and ready to use. UV printing offers a versatile and eco-friendly alternative to traditional printing methods, allowing for printing on a wide range of materials including wood, canvas, glass, and more

how to ensure museums stay alive and not get archived?

museums should have versatile public spaces, adaptive to programs
#hashtaglight

museums play a significant role in cultural preservation by nudging us to pass on intangible values to future generations, not only do museums serve the general public, they also reciprocate the needs of researchers, educators, and experts in various fields. from art museums, natural history museums, war museums to science museums, india is finally developing a range of this typology of public spaces to inspire generations to come. museum are now being developed where cities are keen to build an image as an inclusive footprint on the map, to facilitate tourism and eventually to boost the economy. many iconic museums have also lent themselves as exhibits in addition to the valued exhibits they house, the parameters of good museum design include accessibility, navigation, choreography, scenography and immersive experiences.

had did in the
signages.**

About Signages

Signage encompasses the design and use of signs and symbols to convey information, promote brands, or provide directions. It's a critical element for effective communication, navigation, and safety awareness in various settings, from public spaces to businesses

Exterior signage, also known as outdoor signage, refers to any type of sign that is displayed outside a building or in an open environment. It's used to advertise a business, provide directions, or convey information to people who are outside. These signs are designed to be visible and impactful in outdoor settings, often facing passersby and drivers.

Vinyl FLlooring

Vinyl flooring is a synthetic flooring material made primarily from polyvinyl chloride (PVC). It's a popular choice for both residential and commercial spaces due to its durability, affordability, and wide range of designs that can mimic other materials like wood, stone, or tile.

Vinyl flooring thickness typically ranges from 2mm to 8mm+, with the specific thickness influencing durability, comfort, and suitability for different spaces. Thinner options (2-4mm) are suitable for low-traffic areas, while thicker options (4mm and above) are better for high-traffic areas and offer enhanced durability and sound insulation.

Mug Printing

Mug printing is the process of applying a design, image, logo, or text onto a ceramic or other type of mug. This can be done for personalizing mugs, creating promotional items, or producing unique gifts. Various methods are used, including sublimation, screen printing, and heat transfer, with sublimation being a popular choice for its durability and vibrant results.

Stationery Printing

Stationery printing refers to the process of printing various branded or personalized items used for business or personal communication and organization. These items include letterheads, business cards, envelopes, notepads, and other paper-based materials that bear a company's or individual's branding or unique design.
